How do Billing Blocks work?

Whether it's a customer calling with a product or service question, a new prospect inquiring about pricing or an investor exploring to help you take your business to new heights, every single call is a new opportunity that can turn into business.

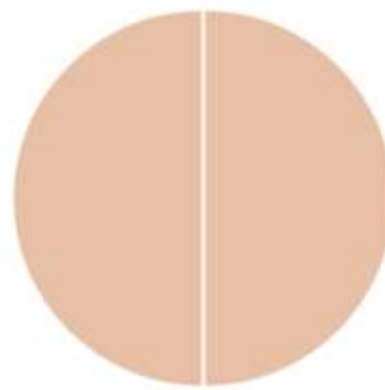

That one call you missed might be the call that changes everything for you. You must ensure you have a phone system that is reliable and allows you to stay connected anytime, anywhere no matter where you are. This way, when opportunity is calling, you are there to answer the call.

astervox

Bills in 1 Second Blocks
1 Minute = 60 Blocks

LOCAL TELCO

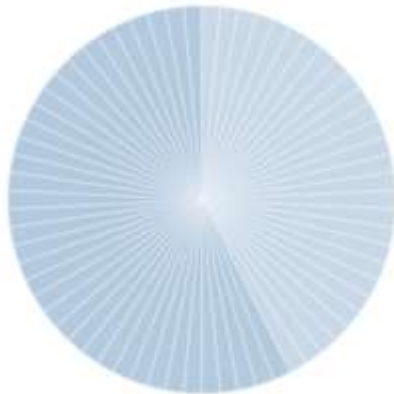

Bills in 30 Second Blocks
1 Minute = 2 Blocks

Let's assume you make a call to a Malaysian mobile phone with a call duration of 35 seconds. astervox and the other local telco charge both RM 0.12 per minute.

Let's see how much you actually pay for this call:

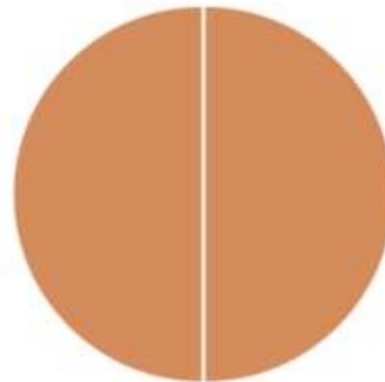

astervox

35 Sec = 35 Blocks
1 Block = RM 0.002
35 Blocks * RM 0.002

Call Cost = RM 0.07

LOCAL TELCO

35 Sec = 2 Blocks
1 Block = RM 0.06
2 Blocks * RM 0.06

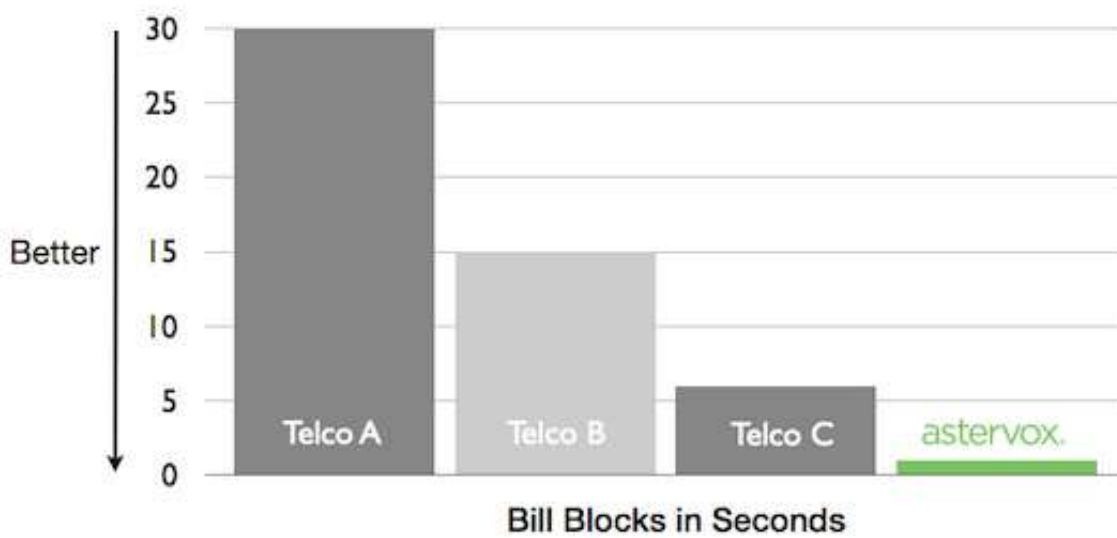

Call Cost = RM 0.12

Your call is more than **40%** more affordable with astervox

Bill Block Comparison

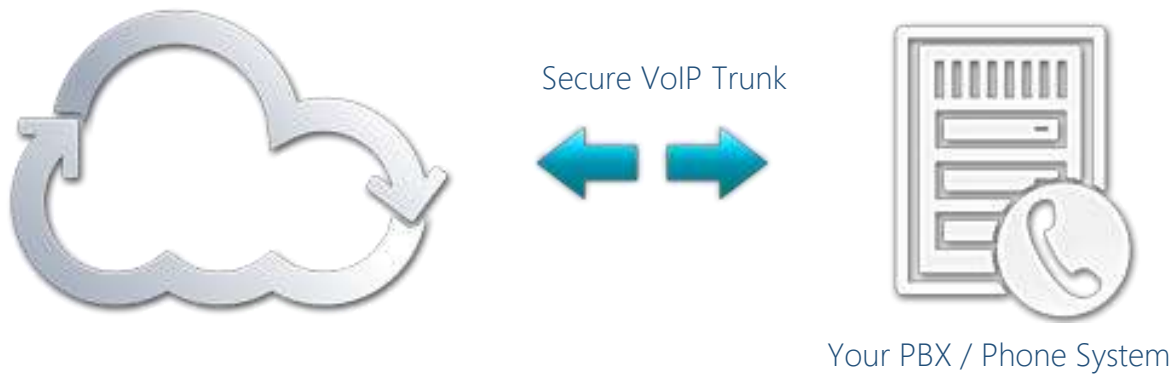

Most telephony provider hide the fact that they charge you in 30 second blocks. That means you always are overpaying even if the rate is substantially lower than a another provider with a higher per minute but lower second block. Essentially the higher the block charge the more you pay for airtime you did not use!

Astervox VoIP Trunks

we provide VoIP trunks to any type of telephony system in case your system is not IP-Based we will provide you with a device that will IP-Enable your PBX so you can enjoy the benefits of our premier affordable call rates.

“are you looking to reduce your monthly telephone bill?

With Astervox, affordable call rates are standard and allow you to reduce your phone bill up to 70% compared to local provider on international routes.

Astervox call rates work with any telephone system and are easily integrated”
